

Petrol is the enemy of diesel engines and by accidentally filling a Diesel vehicle with petrol at the pump you can inadvertently cause thousands of dollars-worth of damage. Often we go through our day on auto pilot and fuelling the family car can be one of those tasks. Rather than rely on a sticker on the fuel cap "Fill Safe" offers complete piece of mind that you cannot accidentally fill your diesel vehicle with petrol.

The easy to install product actually prevents the petrol nozzle being inserted into the tank. It comes with its own specific tightening tool and a high visibility diesel only screw cap.

An extremely affordable insurance policy against costly petrol damage to your vehicle.

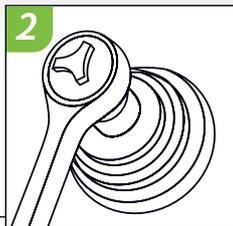

- ✓ PREVENTS ACCIDENTAL FILLING OF PETROL
- ✓ UNIQUE DESIGN STOPS PETROL NOZZLE BEING INSERTED
- ✓ EASY TO INSTALL
- ✓ EXTREMELY AFFORDABLE INSURANCE AGAINST COSTLY PETROL DAMAGE

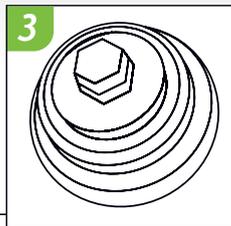

FITTING INSTRUCTIONS

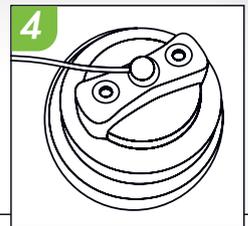

1 Position tightening tool on filler.

2 Screw in filler by hand or bayonet - place as instructed

3 Tighten to 10 Newtons, or sufficient tension to prevent filler unscrewing when cap is removed

4 Install screw cap, and fasten the tether

Part Number: ADCAP
